RapidHarness was designed from the beginning to automatically draw all of your schematics for you in real-time. By handling the drawing, RapidHarness makes your work significantly easier. RapidHarness Wiring Tables can be taken straight to the manufacturing floor. It automatically generates a list of end-to-end connections, allows you to add any additional notes, and makes use of your own custom Wiring Table Templates. RapidHarness has a built-in part database which means you never need to start you designs from scratch. Find the part you need, specify just the attributes you want, or search by specification to start designing now. System level design allows you to decompose complex systems into fully reusable designs. By breaking apart your wiring diagrams into smaller components, RapidHarness enables you to design your schematics from a new perspective. RapidHarness comes with a fully integrated version control system built in. With the click of a button, you can create an immutable version of your design, or create a new version of an existing design. RapidHarness is designed to work seamlessly for teams of all sizes. Part of this design is a fully integrated version control system VCS which connects your team and enables collaboration. Focus on the core of your electrical design, not the artwork Share consistent drawings across engineering and production teams Save time designing, reviewing, and updating your wiring diagrams. Use one of the default templates, or design one with your company's logo Specify only the fields you want Let RapidHarness fill out the rest. Built-In Database of Parts RapidHarness has a built-in part database which means you never need to start you designs from scratch.
