Head lamps are a perfect fit to a Odyssey EX-L. New bulbs were included! The only minor gripe was one of the upper beam connector was hard to hook up due to the rubber housing was partly in the way. But otherwise extremely happy with the lamps. You can tie a cord to keep the bumper hanging. I replaced all my clips, but found the top clips the ones that need to be removed to be in good condition. There are 3 clips of various lengths used for the bumper and lamp assembly SZ, SZ, SX if you decide to replace them. You can look them up on a Honda parts store and see where they are on the bumper diagrams. Also thanks to whomever suggested marking the original lamp's beam height. I actually had to adjust the vertical beam. There's a geared screw on the lamp assembly that can be adjusted with a Philips screw driver. Our headlights are so bright and pretty now! The removal of the old lights and installation of the new ones took my husband and I working together just an hour to do. When I think of how much we saved instead of having a body shop or the dealership do it, I can't help giving five stars. Not only do we have brighter, safer headlights, but we saved enough to be able to enjoy them to lots of lovely destinations! If you've polished and coated, polished and coated and polished and coated your headlights to the point where you can't do them anymore, these are a fine choice for new ones! UPDATE - after less than 2 years they have crazed pretty bad both so it's not likely an isolated incident They are still sealed with no water intrusion but aesthetically they look pretty bad. Images in this review. No more hazy headlights on our Odyssey. I'm very pleased with the fit and quality of these aftermarket headlight assemblies, and you save big bucks over buying OEM replacements. I bought a bag of bumper cover clips as other reviewers suggested. That was a good call. It's amazing how much nicer the van looks now. Not too difficult to install. I watched a few youtube videos and was done in less than two hours. Fairly easy to install. My husband and I did this in about 90 minutes. I did order the extra clips that another reviewer suggested and you will need them. It helps to have a 2nd person. The most difficult thing is getting under the car to reattach the front bumper. For some reason the passenger side light sticks out just slightly. The driver side is flush. My honda's old lights were so foggy! When I drove at night with these new lights I was shocked at the difference. I've essentially been driving in the dark for years!!! These made a huge positive difference. They arrived very well packed and quickly. I bought these because the ones on our Odyssey were so yellow the light was very poor. We had fixed them a few times but it was not working very well. All I can say is wow! It made the van look newer and difference in the light was unbelievable. They come with all new bulbs which was a bonus. It took me about an hour to change them because I had to remove the whole front bumper to be able to access the bolts on the bottom. I would highly recommend these if you need new lights for your Odyssey. One person found this helpful. Got these to replace the old worn headlights on our Honda Odyssey. A BIG improvement. With the help of a YouTube video I was able to install these myself. If you order get a set of the nylon push pins because "x" number of them will break during tear down. Be also prepared to swear some when it comes time to put them back in along the bottom edge of the bumper. Easy to install and good looking. But mounting tab was broken and one of the bulbs exploded. Now one of the lights is foggy in
