Hyundai 2012 elantra

Thanks to head-turning styling, a fuel-efficient engine and a long list of standard safety features and upscale options, the Hyundai Elantra is a top pick for a small sedan. Once a crummy also-ran, then a dark-horse alternative and now one of the sales leaders, the Hyundai Elantra is quite the success story. After last year's complete redesign, the Elantra has shed its frumpy, anonymous styling and gained fluid curves and a coupelike roof line. The Hyundai Elantra looks good, and that counts for a lot in a segment not normally known for visual excitement. Thankfully, there's substance to go along with the Elantra's new sheet metal. Its 1. The latter improves even further for thanks to a new system known as Active Eco. When the driver selects this mode, the Elantra's automatic transmission shift points and throttle response are adjusted to increase fuel economy by up to 7 percent. The downside, though, is more sluggish performance when the mode is engaged. Inside the cabin, occupants are greeted by a bold dash design and controls that are still easy to use. Overall materials quality isn't quite best-in-class that award goes to the Ford Focus , but the Elantra's cabin isn't bargain-basement either. The Elantra can also be loaded up with the sort of comfort and electronics features indicative of a luxury car. Other than a lack of rear headroom for taller folks, the cabin is generally quite spacious. So the Hyundai Elantra is comfortable, well-built, fuel efficient, abundantly equipped, sharply styled and covered by Hyundai's long warranty coverage. Of course, other small cars like the Chevrolet Cruze , Ford Focus , Honda Civic and Mazda 3 are also great choices, making comparison shopping a must. But when it comes to the small sedan segment, we can finally endorse the Elantra as a top pick. The GLS Comfort package adds inch steel wheels, cruise control, air-conditioning, a tilt-and-telescoping steering wheel, solar glass and, when equipped with an automatic transmission, Hyundai's Active Eco system. The GLS Preferred package adds inch alloy wheels, foglamps, upgraded interior trim, a sliding front center armrest, illuminated vanity mirrors, steering wheel audio controls and Bluetooth. The Elantra Limited adds all of the GLS Preferred equipment plus inch alloy wheels, a sunroof, leather upholstery, heated front and rear seats, and a leather-wrapped steering wheel and shifter. Every Hyundai Elantra is front-wheel drive and comes standard with a 1. Vehicles sold in California-emissions states get a partial zero-emissions vehicle PZEV version of this engine, which lowers output to hp and lb-ft of torque. On the GLS, a six-speed manual transmission is standard, and a six-speed automatic is optional. The Limited comes standard with the automatic. The Hyundai Elantra's list of standard safety features includes traction and stability control, antilock disc brakes, active front head restraints, front seat side-impact airbags and side curtain airbags. In Edmunds brake testing, an Elantra Limited needed feet to stop from 60 mph -- a good distance for the segment. In government crash testing, the Elantra received a perfect five stars for overall crash protection, with four stars for overall frontal impact protection and five stars for overall side impact protection. It should be noted that some Elantras that Hyundai built early on received a lower, four-star overall rating resulting from a three-star frontal impact rating. In Insurance Institute for Highway Safety crash tests, the Elantra earned a top score of "Good" for its performance in frontal-offset, side-impact and roof-strength tests. While the Hyundai Elantra isn't quite as exciting to drive as it is to look at, it's certainly not dull. The new 1. The cabin is a relatively quiet place, with little wind noise to speak of, though there is enough road and engine noise to remind you that the Elantra is still a compact economy car rather than the high-dollar sedan it appears to be. If you're looking for some driving fun in your compact car, the Elantra doesn't have the outright handling abilities of the Chevy Cruze, Ford Focus and Mazda 3. Those cars quite simply feel a little more sophisticated. But in general, the Elantra's balance between ride and handling is one of the best in the segment. The Elantra's interior features a curved center stack and stylized climate controls that provide a bit of extra flair while still being easy to use. The design is attractive and the materials, while not quite best-in-class, at least have a rich look to them. With available high-end features like leather, heated front and rear seats, an excellent navigation system and a rearview camera, you can even equip an Elantra to near-luxury levels. In general, the Elantra offers a lot more space than you'd expect from a compact car. Headroom up front is plentiful for 6-footers and the steering wheel is a bit smaller in diameter than usual, which enhances the sense of space up front. The backseat is fine for kids and even most adults, though vertically gifted folks will find its abundant legroom and shortage of headroom a mixed blessing. The Elantra features a large trunk with Available styles include GLS 4dr Sedan 1. Doing so could save you hundreds or thousands of dollars. Edmunds also provides consumer-driven dealership sales and service reviews to help you make informed decisions about what cars to buy and where to buy them. Simply research the type of car you're interested in and then select a used car from our massive database to find cheap prew-owned vehicles for sale near you. Once you have identified a used vehicle you're interested in, check the AutoCheck vehicle history reports, read dealer reviews, and find out what other owners paid for the Used Hyundai Elantra. Is it better to lease or buy a car? Ask most people and they'll

probably tell you that car buying is the way to go. And from a financial perspective, it's true, provided you're willing to make higher monthly payments, pay off the loan in full and keep the car for a few years. Leasing, on the other hand, can be a less expensive option on a month-to-month basis. It's also good if you're someone who likes to drive a new car every three years or so. The names of option packages have also been changed. Read more. Write a review See all reviews. I've seen that some people have gotten lemons, but most buyers are satisfied. I drive over 90 miles a day very aggressively. Appreciate the gas mileage rebate, but the way I drive I wouldn't ever expect anything near 40 mpg.. The interior is noisy and lacks a cushion-like feel, but the sound system with nav. At 70 thousand I needed new tires, wipers and brakes. I exceeded recommendations and had to buy rotors, but that was my fault. I change the oil about every miles because all my miles are on the highway. No mechanical issues that I can fairly complain about. Had the dealer replace the serpentine belt at 75 thousand just to be safe. Update- 96, miles. I did as recommended and allowed Hyundai dealer service dept. Got slammed with a bill for bucks! Feel like that was excessive. Still, no repairs have been required - not even a bad light bulb. Update- , miles. Had a taillight bulb burn out. Had brake pads checked for wear. I don't want to buy rotors again, like I did at 70, due to my neglect. Pads are still good. Had to get all the tire pressure sensors replaced - two recently. These are fifty bucks apiece plus labor. I don't appreciate having to spend so much for what I think is unnecessary technology. I can tell by looking if a tire is soft. I think this is a widespread inconvenience not unique to this make and model car. I will need new tires again, in the next 5 or 10 thousand miles. Update: , miles. Have had to replace battery, another brake rotor and all brake pads. One ignition coil pack. A bunch of light bulbs and long piece of brake line. The ice melt chemical the state puts on the roads in the winter rotted out the brake rotors and the brake line, I was able to replace most of these items myself, so the expense wasn't too bad. Still running great! Update: , plus a few more. Bought new tires right after last review. Having trouble connecting cell phone. My phone is getting old, so maybe a software update disabled my connection. Will check the web about this. No other difficulties at this time. Read less. Wont buy a Huyndai again. My biggest issue is that periodically my car won't start because the gear gets stuck in park. I've called a tow truck several times until I was finally able to get the manual gear button pressed and get it out of gear. Sometimes pressing it doesn't always work and it takes awhile to get it to work, and I've been stuck for a while before getting my car started again. This is extremely frustrating, and has never happened with any other brand of car I've owned, ridiculous. Also, you have to constantly correct the steering wheel when driving on the highway - I've had the car aligned several times, and this never gets any better, fine in the city, but at faster speeds its very annoying. Then, the windows are very narrow, which makes seeing out around you more difficult. The steering wheel is placed right in front of the air vents, so most of the air gets blocked and doesn't reach the driver, extremely frustrating, because I have to move my head to the left of the right to get any air on my face. For the price which was new when I bought the car in , their were other brands that I could've chosen but instead tried a Hyundai Elantra, and I wish I had gotten a different brand. For what I paid which was comparable to other mid range cars, I feel these problems are not acceptable. I therefore am leery about any other Hyundais in the future after my current Elantra, and wouldn't buy this brand again because of my current experience. For the price, there are better cars in the same price range. Can NOT reccomend this car. I hope a ton of people read Edmunds reviews and will not be lured in by Hynundais pleasing designs and high option content, I see there are others here that are dissapointed! I had TWO Elantras, the first one bought back due a intermitent "no start" problem that the dealership counld not fix. We had car 1 for about 3 months. Car 2 has suffered from several stall outs, this happens in the City, or on the Highway. My bluetooth has never worked right, cruise control worked when it wanted to, had a clunk in the front suspension from 8k miles, the engine developed a nasty ticking sound at idle, and of course the fuel mileage, I've seen best 28 mpg while drafting a semi in Montana. No regrets yet. The interior space is comparable to the Sonata giving me plenty of leg and head room for my 6'2" frame. Back seat space comfortably accommodates 2 adults. The new hp 4 cylinder has plenty of pop and the 6 speed transmission operates smoothly. The eye-catching design is a real head turner. We did get the preferred package which adds a few extras. After reading a few reviews, I was concerned about the gas mileage being overstated, but we recently got over 41 mpg on a road trip and average about on our first 3 tanks of gas.

This is according to the on board avg indicator. See all reviews of the Used Hyundai Elantra. Write a review. Frontal Barrier Crash Rating. Dynamic Test Result No Tip. IIHS Rating. Side Impact Test.
