Ko3 Upgraded Turbo Stuffed Turbo. Add to cart. Kdm Tuners Throttle body Spacer. Related Products. Hyundai Kia G4fj 1. Newsletter signup Name Email. The Kdm Tuners Throttle Body Spacer was designed to make a simple solutions to adding a boost gauge, Meth port, or any other attachment that may need to be tapped in the the throttle body. Many throttle body spacers on the market make claims of a HP gain, while they may add HP we at Kdm Tuners are on the fence about such claims. We decided to not market them as a HP gaining part and as a accessory. If these do boost the HP up a tad then that is just an added bonus! These Spacers feature 3 top mounted ports for east access to add the items you need with out having to drill, cut, weld, etcâ€! These also are ideal if you ever need to go back to stock. These spacers come with all the hardware needed to install and extra plugs so you can choose to use 1 port, 2 ports, or all 3 ports. We promise to never spam you, and just use your email address to identify you as a valid customer. A nice quality product. Honestly if you are even contemplating Meth, get this, install it and go from there. It just makes everything so simple. All prices are in USD. Please wait Sign in or Create an account. Newsletter signup Name Email. Here's what I've found to be consistently true: 1. The overall suspension geometry in the rear appears to be universal. It's all five link with the spring mounted on the rearmost lower control arm. The subframes, however, mount to the chassis in slightly different ways depending on application. The lower half of the front suspensions appears to be universal in geometry and dimensions. Not sure what to make of this. This is aluminum rear knuckle version 1, off an Equus. Here's what I've found to be inconsistent and confusing: 1. However, I've literally never found the same combination of parts on any two cars. The amount of aluminum that ends up in the rear suspension appears to be almost completely random. The G70 was entirely iron. The amount of aluminum in the front suspension is not quite as random, but it's close. All the multilink cars have iron uppers and aluminum knuckles. This is consistent. Most but not all of the luxury applications have aluminum lower control arms. I've seen Genesis Sedans both with and without aluminum lower control arms. The Equus was all aluminum, as was the SUV thingy. The K9 was iron in the front control arm and aluminum on the rear. So, if my logic is sound to this point, there are aluminum versions of the following things: Rear knuckles two versions. Spring mounting lower control arm in the rear suspension. The front lower control arm in the rear suspension. The upper front control arm in the rear suspension. Everything in the bottom half of the front suspension. However, which of these parts will end up on which car seems almost random. Is there anyone skilled in parts-catalogue-fu who can help me with part numbers or application guides? For reference, the two blue, aftermarket parts in the foreground of this picture are the only two links I haven't found a factory aluminum version of. Give me some time. I don't have the access I once had but I found a few good sources for catalogs. Whatever they have they use. You'll need to log in to post. Log in. Login Digital Edition Buy a Subscription. The rear knuckles appear to swap universally. Here's aluminum knuckle version 2, off a Genesis sedan. Here's the iron knuckle. Jump To Lots of Fabrication Talk. The Korg KDM-2 is an easy-to-use, electric metronome that visually marks the tempo with remarkable accuracy, and delivers a powerful sound like never before. Korg's acclaimed cylindrical speaker has been further enhanced with an improved resonator structure to ensure that it's easily heard. Even loud instruments won't overpower its unmistakable, clear sound. The volume can also be adjusted to the most appropriate level. It's a great feature if you want to practice with a silent metronome. From basic beats to variations like son clave and rumba clave, the KDM-2 contains a total of 19 beat patterns. You can set the tempo in any of three ways. Full Step mode that lets you adjust the tempo over a range of 30 through in steps of one. Pendulum Step mode lets you set the tempo using the preset tempo settings, as on a mechanical metronome. Sound Out mode outputs a reference tone that you can use as a tuning guide. You can also adjust the A4 frequency calibration in a broad range from Hz to Hz. The KDM-2 provides a memory backup function that remembers the specified tempo, beat, calibration, and reference pitch even when the power is turned off. The large LCD screen makes it easy to view the settings. Featuring an original design that's compact yet stable, the KDM-2 is at home on your desk, your piano, or anywhere else. The KDM-2 is designed for long battery life. It will continue marking an accurate tempo for approximately hours of continuous use at a tempo of

beats per minute. All Rights Reserved. Choose Your Country. News Location Social Media. About KORG. Buy Now. Support for Your Purchase Buy Now. Support Manuals. Learn More Event. Improved cylindrical resonator speaker delivers even clearer and more powerful sound Korg's acclaimed cylindrical speaker has been further enhanced with an improved resonator structure to ensure that it's easily heard. A variety of beats cover even sophisticated rhythms From basic beats to variations like son clave and rumba clave, the KDM-2 contains a total of 19 beat patterns. Use the reference pitches to tune by ear Sound Out mode outputs a reference tone that you can use as a tuning guide. Memory backup function The KDM-2 provides a memory backup function that remembers the specified tempo, beat, calibration, and reference pitch even when the power is turned off. Designed for stability and ease of use The large LCD screen makes it easy to view the settings. Long battery life The KDM-2 is designed for long battery life. We are proud to announce the latest model, the KDM-3 which features a fresh new appearance. Along with an attractive look that resembles a miniature mechanical metronome, it also contains a rich variety of beat patterns and metronome sounds. It's also packed with the convenient functions that you expect from a digital unit and will support your performance in situation, regardless of genre or instrument. This is limited-edition KDM-3 uses wood for the front panel, for a unique and elegant appearance. This second limited edition model pairs the white body with a bright, milky-white maple woodgrain. Its natural and modern appearance emanates a sense of peacefulness and is a perfect addition to your practice room. The KDM-3 is well-known for its powerful and easily-heard sound and a compact size. A limited number of units are now available featuring a front panel made of durable and elegant pyinkado wood. The chic brown woodgrain adds warmth to the monotone body. It will fit nicely on a tabletop, on your piano, or in any practicing environment. Featuring a newly designed sealed speaker enclosure, it delivers powerful volume that exceeds its compact size. The lineup gives you a choice of two colors: sophisticated black or pure white. The design is not the only way in which this unit is reminiscent of a mechanical metronome. The KDM-3 now provides the sound of an acoustic mechanical metronome. You can also choose alternative sounds to suit your performance or instrument, including cowbell, rimshot, or voice. All of these sounds deliver a clear tone that is easy to hear and will not be obscured even by high-volume instruments. In addition to beats per measure with your choice of duplets, triplets, triplets omitting the middle note, quadruplets, and quadruplets omitting the middle notes, we've provided variations such as son clave and rumba clave, for a total of 19 built-in beat patterns. From classic to pop, jazz, and Latin, this unit covers your needs in a wide range of genres. Timer mode is a function that operates the metronome for a specified length of time and then automatically stops. You can even start practicing with the volume set to zero. The content of the setting is visible at a glance in the large display. Sound Out mode produces a reference tone from the built-in speaker or through connected headphones, allowing you to tune by ear. It can generate 12 reference tones in the range from C4 The calibration of the A4 pitch can also be adjusted over a wide range of Hzâ€" Hz. Even when the power is turned off, the Memory Backup function preserves the specified tempo, beat, calibration, and reference tone. These settings are initialized when the batteries are replaced. The Auto Power-Off function automatically turns the power off when 20 minutes have elapsed with the metronome stopped. All Rights Reserved. Choose Your Country. News Location Social Media. About KORG. Support Manuals. Learn More Event. News A classic design with the functionality that you expect from a digital unit. Make every day practicing more enjoyable with the KDM Eight metronome sounds, including a mechanical metronome sound. Easy one-touch operation and an easily-readable display. Choose from three types of tempo settings to suit your needs Sound Out mode lets you tune while listening to a reference tone. Timer mode is convenient for practicing the basics. Memory Backup function and Auto Power-Off function. Long-life design ensures worry-free performance even during extended practice sessions. The second in a series of wood-faced KDM3 metronomes. Announcing a limited number of units in a gentle white color scheme. Featuring a natural wood front panel. Announcing a limited number of natural wood front panel units with a rustic and artisanal feel. Timer mode is convenient for practicing the basics Timer mode is a function that operates the metronome for a specified length of time and then automatically stops. Sound Out mode lets you tune while listening to a reference tone. Memory Backup function and Auto Power-Off function Even when the power is turned off, the Memory Backup function preserves the specified tempo, beat, calibration, and reference tone.
